

Homework -review card play

You are in 4Sp. The lead is the K Hrts. You win and play the Ace spades with everyone following. To the next trick you continue drawing trumps and play the King spades - unfortunately the player on your left shows out on this second round of trumps . It is clear the the righthand opponent cannot be prevented from making a trump trick. What do you lead to trick 3 ? The Queen spades or something else ? (you better specify what the something else is if that's your choice).

What cards make up this first trick ? ie it may be that you finessed at this first trick or didn't finesse ! No doubt the makeup of the rest of the hand went someway to influencing your play at trick 1 . No doubt.
