

Q2)

Here is a novelty question that you can try and solve on a long train journey sometime perhaps.

i) If the declarer was in a contract of *six spades* which suit would need to be led to allow the declarer to make their contract ?

*Or, to put it another way -*

*would you expect to make the contract on the lead of a spade, heart, diamond or club?*

ii) Having chosen the lead that you think gives you a chance to make 12 tricks how do you proceed to play?
