

11)

You are in 1NT doubled and go 2 light. You say good humouredly to partner that " that wasn't so bad was it ?". Something about the look in partner's eye suggests to you though that it wasn't so good either. You decide it is time to learn to score- after all you have only been playing the game for 5 years and well , you've been busy.

Try and fill in the following table inserting 100 , 200 ,300 , 500 ,800 ,1100 in the appropriate column.

Tricks light	Not Vuln	Vuln
1 off doubled	?	?
2 off doubled	?	?
3 off doubled	?	?
4 off doubled	?	?

Heres a mathematical clue, the total penalty for {1 off+ 2 off +3 off + 4 off } equals 1700 not vulnerable and 2600 vulnerable .
